Lead Software Engineer with 4+ years of enterprise experience specializing in modern JavaScript/TypeScript ecosystems and scalable client-side architectures. Proven track record of leading engineering teams, building component design systems, and leveraging AI-assisted workflows to maximize velocity.

Professional Experience

Lead Software Engineer | Medpace | June 2025 – June 2026

- Led a team of four engineers in developing complex shared software libraries, successfully standardizing tooling and reducing redundant development efforts across 25 software development teams.
- Contributed to a reusable, enterprise-wide TypeScript component library, standardizing UI consistency and reducing frontend codebase sizes by 10% across 30 applications.
- Spearheaded feature discovery, architectural design and full-stack development for business-critical enterprise applications.
- Integrated AI code assistants (GitHub Copilot, Claude Code) into the team's workflow, streamlining the development process and boosting development velocity.

Software Engineer / Team Lead | Medpace | May 2023 – June 2025

- Led a team of five engineers to design and create a web application to manage setup of complex metadata for medical clinical trials.
- Implemented state management tools to optimize DOM rendering for 10k+ rows of real-time medical data, significantly reducing page load times.
- Managed and delivered multiple application releases with difficult features, improving user workflow efficiency.

Software Engineer | Medpace | August 2022 – May 2023

- Contributed to multiple cross-functional teams, quickly mastering new tech stacks to accelerate the development of a major new mobile application.

Projects

Selected Software Projects | ethan-britton.com

- Multiple web and mobile application projects built primarily with React, TypeScript and Express.

Education

Bachelor of Science, Major in Computer Engineering, Minor in Computer Science | August 2017 - May 2022 | University of Cincinnati, Cincinnati, Ohio

- Honors: Outstanding Senior Design Project — Built *Linedo* (React Native/Express/MongoDB), a full-stack mobile application awarded the highest overall project score in the 2022 Computer Engineering class.

Skills

Programming Languages: JavaScript, TypeScript, Python, SQL

Frameworks: React, React Native, Express, Next

Databases: MongoDB (NoSQL), MySQL (SQL)

Web Technologies: HTML, CSS, Sass/SCSS, REST APIs, GraphQL

Dev Tools: Git, VS Code, Docker, Github Copilot, Claude Code, Figma
